Summary

Data Analyst with hands-on experience in SQL, Power BI, Python, and Microsoft Fabric across **4 analytics projects** covering reconciliation, inventory, sales, and revenue tracking. Reduced manual investigation effort by **~60%** through ETL workflows, KPI dashboards, and exception monitoring. Seeking a Data Analyst or BI Analyst role focused on reporting automation, business intelligence, and operational insights.

Technical Skills

Analytics & BI: SQL, MySQL, PostgreSQL, Power BI, DAX, ETL Workflows, KPI Design, Exception Reporting, Data Validation, Trend Analysis, Ad-hoc Analysis

Data & Cloud Tools: Microsoft Fabric, MS Excel, PivotTables, VLOOKUP, Power Query, Python, Pandas, Google Sheets, Power BI Service

Other Tools: Git, MS Office Suite **Soft Skills:** Analytical Thinking, Root Cause Analysis, Attention to Detail, Stakeholder Communication

Work Experience

Web Development Intern

Jul 2025 – Sep 2025

Zebaq Pvt. Ltd

Bhubaneswar, India

- Delivered **1 client-facing web solution** from requirement gathering to final validation, improving project ownership and acceptance-check discipline.
- Maintained **5+ live production websites**; resolved functional issues and documented defects with root cause details for faster issue tracking.
- Executed post-deployment testing across **3 release cycles**, tracking defects to closure and strengthening QA practices transferable to data operations.

Projects

Schneider Electric — Industrial Automation Revenue Analysis | *Python, Microsoft Fabric*

InProgress

- Analyzed **multi-period segment records** using Python and Pandas to map revenue movement, recovery patterns, and YoY growth across industrial automation lines.
- Implemented **1 repeatable Microsoft Fabric workflow** to ingest source files, transform business metrics, and prepare clean outputs for dashboarding.
- Identified **3 key performance dimensions** — revenue, recovery rate, and YoY growth — to support executive-level business review and planning.

Transaction Reconciliation & Exception Monitoring System | *SQL, Power BI*

Mar 2026

- Reconciled gateway, bank, and merchant records across **3 transaction sources** using SQL joins, filters, and validation checks to detect mismatches and duplicates.
- Created **5+ KPI cards** in Power BI covering exception volume, settlement delays, and resolution status for faster operational review.
- Reduced estimated manual investigation effort by **~60%** by generating exception summaries that supported root cause review and BAU workflows.
