

B. SAI KRISHNA

Data Analyst | BI Analyst | Junior Analyst

Bhubaneswar, India | +91-6317425229 | saikrishna34326@gmail.com | linkedin.com/in/saikrishnacodes/ | github.com/Sai-krishnaa

PROFESSIONAL SUMMARY

Detail-oriented Data Analyst with experience across payment reconciliation, inventory analytics, and sales performance reporting using SQL, Power BI, and Python to transform raw transactional data into actionable business insights. Skilled in ETL pipeline design, KPI dashboard development, and exception reporting that supports root cause analysis and BAU operations. Looking to contribute to a data-driven fintech or e-commerce team as a Junior or BI Analyst.

EDUCATION

Bachelor of Computer Applications (BCA) | ITER, Bhubaneswar 2022 – 2025
Higher Secondary & Secondary (CBSE) | Venkateswar English Medium School 2019 – 2022

WORK EXPERIENCE

Web Development Intern | Zebaq Pvt. Ltd Jul 2025 – Sep 2025

- Delivered a client-facing website end-to-end — gathered and scoped requirements, developed the solution, and validated final functionality against acceptance criteria, demonstrating structured project delivery.
- Maintained 5+ live production websites; monitored for issues, applied targeted fixes, and produced structured defect reports building documentation and quality assurance habits transferable to data operations.
- Conducted systematic post-deployment testing, logged defects with root cause detail, and tracked resolution to closure demonstrating a methodical, data-informed approach to quality control.

PROJECTS

Transaction Data Reconciliation & Exception Reporting System | SQL · Power BI · Python · Excel Jan 2025 – Present

- Designed and executed a multi-source ETL pipeline in SQL to extract, transform, and reconcile gateway, bank, and merchant transaction records across 3 data sources : identifying mismatches, duplicates, and critical data gaps at scale.
- Built a Power BI dashboard featuring 5+ KPI cards tracking exception counts, settlement delay rates, and resolution status; validated all outputs against source data to ensure 100% accuracy prior to stakeholder delivery.
- Produced structured exception reports enabling root cause analysis and BAU resolution workflows, reducing estimated manual investigation effort by ~60% vs. prior spreadsheet-based methods.

Zepto Inventory Analysis | SQL · Power BI · Excel Jan 2026

- Queried and analyzed multi-category inventory datasets using SQL to identify stock-out patterns, overstocking trends, and demand anomalies, providing supply planning teams with targeted, data-backed recommendations.
- Defined and documented 3 core KPI metrics, inventory availability rate, fulfilment rate, and stock turnover — aligning all dashboard reporting outputs directly with business objectives.
- Generated exception reports flagging data completeness gaps across product lines, supporting corrective action and driving data-driven inventory decisions.

Mobile Sales Interactive Dashboard | SQL · Power BI · Excel Dec 2025

- Built a fully interactive Power BI dashboard analyzing mobile device sales performance across 10+ brands, multiple cities, payment modes, and monthly time periods with dynamic slicer-based filtering.
- Designed 4 KPI cards: Total Sales, Quantity Sold, Transaction Count, and Average Order Value, enabling drill-down analysis by region, brand, and season for self-service stakeholder reporting.
- Delivered insights on top-performing brands, seasonal demand trends, city-wise sales distribution, and customer ratings, surfacing patterns not visible in raw transaction data.

TECHNICAL SKILLS

- Analytics & BI:** SQL (MySQL, PostgreSQL), Power BI, DAX, ETL Workflows, KPI Dashboard Design, Exception Reporting, Data Validation, Trend Analysis, Ad-hoc Analysis
- Data Tools:** MS Excel (PivotTables, VLOOKUP, Power Query), Python (Pandas, NumPy), Google Sheets, Power BI Service
- Other Tools:** Git, MS Office Suite, Email/Documentation | Soft Skills: Analytical Thinking, Attention to Detail, Problem-Solving, Adaptability, Teamwork
